store the electronic medical record**

Printing out information (Visits and Admission)

There is no help card for individual prints - only how to handle report printing in general: how to get them, how to see them, how to print them, how to store them or to send by e-mail. Then list the groups of prints. Say how to configure a printer. Then how to order specialized printouts from NetCom or to get notifications of new printouts available.

Various reports like these are still in the development phase so are not yet integrated into the menu. Please let the system manager know of any needed reports and they will be added to the development list.
